OBJECTIVE

- Full Stack Developer Targeting Full-stack Developer roles with an organization of high repute with a scope of improving knowledge and further career growth.

EDUCATION

- **St Peter's Engineering College** — Hyderabad, India
  Bachelor of Technology - Electrical Dept; CGPA: 6.42 — *July 2019 - April 2024*

- **SMS Junior College** — Siddipet, Hyderabad
  Intermediate Board - MPC; GPA: 7.78 — *July 2017 - April 2019*

SKILLS SUMMARY

- **Libraries**: React.js, CSS, Hibernate, JPA, Apache Commons, Servlet API, JSP, Apache HttpClient, Spring Security
- **Frameworks**: Node.js, Express.js, Spring Boot, Angular
- **Technologies:**: JavaScript, Java, HTML, MongoDB, MySQL, Core Java, RDBMS
- **Platforms**: Web, Windows, Arduino
- **Technical Skills**: Designing FrontEnd and BackEnd, APIs, Web Applications, Programming Languages, Web Design, GIT
- **Soft Skills**: Leadership, Event Management, Writing, Public Speaking, Time Management, Organizational

EXPERIENCE AS A TRAINEE

- **TalentSprint Coaching** — Institute
  Student Developer (Full-time) — *Dec 2023 - Sep 2024*
  - **Training and Learning**: focus on mastering Java syntax, OOP concepts, and frameworks like Spring Boot.
  - **Hands-on Coding**: work on small projects and contribute to larger team efforts through coding assignments.
  - **Collaboration and Teamwork**: engage in Agile processes and receive mentorship from senior developers.
  - **Exposure to Tools and Technologies**: using IDEs like IntelliJ and VS code, databases like MySQL, and tools like Maven and Git.
  - **Building Confidence**: gained confidence in writing clean, efficient code and handling bigger tasks.

PROJECTS

- **Rental Homes** : The "Rental Homes" project uses the MERN stack—MongoDB, Express.js, React, and Node.js—to create a platform for searching, listing, and managing rental properties. MongoDB handles data storage, Express.js and Node.js manage server-side functionality, while React provides a dynamic user interface. This setup ensures an efficient and user-friendly experience.

- **I-Nexus**: "I-nexus" is an e-commerce website utilizing Angular for the frontend, Spring Boot for the backend, and MySQL for database management. It features full-stack development with TypeScript for a seamless user experience. The project encompasses programming and deployment to deliver a fully functional online shopping platform.

- **GPS Tracker**: The "GPS Tracker" project uses an Arduino Nano, GPS module, LED display, SIM card, and battery to create a compact tracking device. It involves hardware collection and documentation preparation for building and implementing the tracking system.

- **Chat-Web**: The online chatting web project employs the MERN stack for the frontend and backend, with Java integrated for additional server-side functionalities. It enables real-time communication through a robust and scalable platform for users.

- **I-BOMMA Clone**: The "Bomma Clone" project uses MySQL for database management, Angular for the frontend, and Spring Boot for the backend to recreate the Bomma platform's functionality.

CERTIFICATION

- **FULL STACK JAVA DEVELOPER**:
- **SPEECH-X Soft Skills and Communcation**:

INTERNSHIPS

- Embedded Systems BY Path Creation
- Arduino BY path Creation
- Career Higher Ed Fest

VOLUNTEER EXPERIENCE

- **College Student Council member and Director**

  I was a club member and Director of the Student Council during my B.Tech. I played a crucial role in hosting the 2023 annual day of my college as a Student Council member and Director. This experience showcases my leadership abilities
